People

- Architects: Stendel + Reich, architects
- General Contractor: Pomerleau, Quebec City, QC
- Foundation Engineers: Pasquin St-Jean & Associés, Montreal, QC

Products

- Murox High-Performance Building Systems manufactured 13,000 square feet of load-bearing wall panels.
- The two exterior wall panel finish are roll-formed Stelcolour 8000 + Series™ steel sheet painted Putnam Ivory. Steel sheet basis is a proven formulation of advanced polyester resins with added silicone for enhanced durability and color retention.
- A third wall has a DensGlass Gold® Exterior Sheathing with brick ties, all shop-installed and ready to receive masonry on site.
- The façade consists of a conventional beam-column frame also ready to receive precast on site.
- Canam Steel fabricated 139 tons of joists, joist-girders and structural steel as well as 52,000 square feet of steel deck.

Highlights

This project was delivered in four weeks of the customer's approval of the engineering drawings, and erection was completed in nine working days.
