

# SCM Eastern Distribution Ctr (Wal-Mart), Cornwall, Ontario

The sheer size of the project posed **interesting challenges to meeting erection deadlines.**

Coordination of engineering, production and shipment of more 4,000 joists to arrive on site in 30 sequences has required a constant follow up.

The customer was particularly satisfied with Canam's delivery performance. Everything went as planned. Not a shop fit up problem happens during installation.

This performance led to the awarding of two contracts of similar dimensions with this same customer.

In addition, a national agreement was reached with a major real estate developer concerning the purchase of joists for construction of most Wal-Mart stores in Canada.

---

Dimension: 1,012,320 square feet

---

Location: Cornwall, Ontario

---

Period: Spring 2002

---
