

# MUROX

## Firewall

UL listed fire-resistant load-bearing walls  
and curtain walls

 **MUROX**<sup>®</sup>  
High Performance Buildings

# MUROX

## Firewall

The in-plant installation of fire protection provides the **Murox System** with multiple advantages:

- Allows for the construction of buildings in close proximity to peripheral areas where superior fire resistance is required by municipalities
- Provides fire protection from the inside out
- 1 hour UL rating (complies with both Canadian and U.S. standards)

The **Murox Firewall** can generate substantial savings:

- Does not require additional installation time
- In-plant fabrication guarantees the expert installation necessary to obtain maximum fire resistance
- Leaner work site in terms of materials and intermediaries
- Can be installed year round

Murox provides High Performance, load-bearing, panelized building systems for the industrial, commercial and institutional construction markets.
