People

- Owner: CGC Inc.
- Steel fabricator: Acier Robel Inc.
- Architect: George Elbaz Architect
- Engineering firm: DSM Consultants Inc.
- General contractor: Construction Première Inc.

Products

- Canam fabricated more than 450 tons of joists, joist girders, purlins, girts and steel deck for the construction of this building.

Highlights

This project covering 7,000 square metres (75,000 sq. ft.) features walls at an inclination angle of 50 degrees.

The CGC Shed project received a 2007 CISC-Quebec Award of Excellence in the "Panel's choice" category.

This architecturally unique project posed a major challenge and called for a customized solution, which Canam Canada had the expertise and design flexibility to deliver.
