## People

- Architect: Becker Engineering, Windsor, ON
- General contractor: Raquel Noel LLC, Hodgkins, IL

## Products

- Murox High-Performance Building Systems manufactured 18,000 square feet (1,672 m<sup>2</sup>) of load-bearing wall panels.
- The exterior wall panel finish is roll-formed Stelcolour Metallic Series™ steel sheet painted silver. Steel sheet uses a four-layer coating system consisting of primer, base coat, color coat and clear topcoat. The three coats over the primer contain at least 70% Kynar 500™ or Hylar 5000™ fluoropolymer resins, all proven in applications over the past 35 years.
- Insulated doors and aluminum-framed thermal windows were plant-installed.
- Canam Steel fabricated 47 tons of joists, trusses and structural steel as well as 22,000 square feet (2,042 m<sup>2</sup>) of steel deck.

## Highlights

This project features a conventional steel-framed design at the glazed main entrance and required 43-foot (13-m) high wall panels, a 10,200-square-foot (948-m<sup>2</sup>) mezzanine and 90 feet (27 m) of standard Murox canopy.

The project was delivered in four weeks of the customer's approval of the engineering drawings, and erection was completed in 18 working days.
